SUMMARY

Clinical UX & Interaction Designer with 2+ years of HCI research experience.
Bridging the gap between complex intelligent technology and human understanding by applying spatial interaction design and evidence-based UX research to medical XR, surgical training, and clinical AI systems.

EXPERIENCE

Interaction Designer & GRA, SNUH Medical Spatial Computing Lab

Seoul · June 2024 – Present

Lead end-to-end interaction design and prototyping for XR clinical applications across medical education, surgical training, and clinical workflows, deployed on Apple Vision Pro and Meta Quest 3. Translate field observations and stakeholder interviews with clinicians and end users into requirement sheets, design documentation, and interaction flows for cross-functional collaboration. Partner with clinicians and engineers to build anatomical 3D models, procedure-based animations, and immersive training flows, while running usability evaluations and study protocol design. Prototype human-AI interfaces for clinical contexts, translating complex AI behavior into trustable, usable tools.

Undergraduate Researcher, SNUH Medical Spatial Computing Lab

Seoul · March 2023 – October 2023

Developed LAPA VR, a laparoscopic cholecystectomy training simulator — built anatomical 3D models, animated procedural steps, and prototyped interactions in Unity. Built Foot AR/VR, an interactive foot bone anatomy module reconstructing structures from clinical CT data via OsiriX. Designed XM.verse VR immersive tour for the SNUH Clinical Trial Center. First-authored a user study on interaction comfort with AI-generated digital humans in virtual medical environments.

Intern, Sae-A Trading Overseas Sales Team

Seoul · September 2021 – June 2022

Prepared and organized fabric swatches and garment trims for international buyers and factories. Conducted quality checks by measuring garment dimensions and verifying details against specifications.

ACTIVITIES

XR Designer & Branding Team Leader, XREAL (University Student XR Society)

Seoul · September 2022 – April 2024

Directed the brand identity and visual systems for XREAL conferences and hackathons, designing cohesive print collateral and digital assets. As team leader, pitched and prototyped I CAN BE (AI-powered interactive service for pediatric hospital contexts) and Black-Out VR (3D narrative-based VR/PC game).

AWARDS

Excellence Award (Corporate Project Category), 2024 Metaverse Developer Contest
Best Poster Award, KOSMI 2023 (Korean Society of Medical Informatics)
First Prize (Open Category), 2023 Metaverse Developer Contest
Top 5 Candidates, 2023 V-Stars Contest hosted by Devs United Games

EXPERTISE

Tools and Softwares

Blender, Figma, Unity, Adobe CC (Ps, Ai, Id, Ae, Firefly), Claude, Cursor, Antigravity, C#, Python, Rhino, Keyshot

Skills and Domains

UX Design, Interaction Design, User Research, Usability Evaluation, Prototyping, 3D Modeling, Procedural Animation, Requirements Documentation, Study Protocol Design, Human-AI Interface Design, Medical XR, Surgical Training, Clinical Workflow Analysis

EDUCATION

Kookmin University, M.S. in AI Design

Seoul · September 2024 – August 2026 (Expected)

Sungshin Women's University, B.F.A. in Textile Design

Seoul · March 2018 – February 2023
